EDUCATION

University of Maryland, College Park, MD
Bachelor of Applied Science in Computer Engineering
Expected Graduation: May 2029
GPA: 3.5/4.0

Prince George's Community College, Largo, MD
Associate of Applied Science in Information Technology
May 2025
GPA: 3.7/4.0

PROFESSIONAL EXPERIENCE

Research Software Engineer, National Energy Technology Laboratory, Pittsburgh, PA June 2026 – August 2026

- Engineered automation scripts using Python, Java, and Windows PowerShell to streamline analysis of hundreds of scientific experiment datasets, significantly reducing manual processing time at the National Energy Technology Laboratory.
- Leveraged ImageJ to automate image-based data analysis workflows, transforming previously manual research processes into efficient, repeatable pipelines that accelerate experimental results interpretation
- Increased workflow by 120% in analyzing data, producing results significantly faster.

LSAMP Bridge Program, College Park, MD June 2025 – May 2026

- Selected as one of 40 incoming freshmen for the NSF-supported Bridge program, participating in workshops alongside professionals.
- Engaging in research and volunteering opportunities, community-building activities, and supplemented learning.

IT Infrastructure Analyst, IFEM Wireless, Lanham, MD *June 2024 – August 2024*

- Supported IT and cloud operations by participating in four weekly team meetings focused on licensing, networking, and cloud computing fundamentals.
- Created and delivered technical presentations to peers, strengthening communication and collaboration skills.
- Assisted in hardware setup and system troubleshooting, applying hands-on computer assembly and maintenance skills.

PROJECTS & ADDITIONAL EXPERIENCE

Custom PC Builds & PCB Design

- Designed, soldered, and programmed custom embedded hardware (e.g., an Arduino-based game controller) and optimized high-performance client PCs. *(Detailed hardware portfolio available).*

Faculty Website Development (SharePoint)

- Collaborated with a small team to create and deploy a SharePoint website for faculty communication and resource sharing.

Church Media System Redesign

- Led projection and display redesign for local church services, improving visual clarity and reliability during events.

Over-Terrain Vehicle Automation

- Programmed an autonomous robot using Arduino IDE to navigate obstacles, measure fuel cell voltage, and deploy hydrogen/oxygen atoms.

Handshake AI

- Selected for Project Hedgehog, Manuscript, Halcyon, & more at Handshake AI, for reviewing hundreds of AI responses for accuracy and clarity, conducting research to identify errors, provide feedback, and strengthen the LLM understanding of complex topics.

LEADERSHIP

Student Ambassador, Prince George's Community College September *2022 – May 2025*

- Represented the college at community events and supported peer engagement initiatives to increase student involvement.

TEAM In-Game Leader, University of Maryland Esports August 2026 – Present

- Serve as In-Game Leader for the University of Maryland's competitive Valorant team, directing pre-round and mid-round strategy calls that guide teammates through high-pressure, real-time decision making.

SKILLS AND PROFICIENCIES

Core Competencies: Team Leadership | Communication | Problem Solving | Collaboration | Time Management | Project Execution
Technical Skills: KiCad | Adobe Photoshop, Illustrator, InDesign (2024–26) | Canva | SharePoint | PC Building & Troubleshooting | Soldering | Robotics Design (VEX & Arduino)
Coding Skills: Java, HTML, C++, Arduino IDE, Python, Verilog
